

I really think that this student deserves a merit as far as the study of mathematics is concerned. She has always got good mark in the class during assessment, class test as well. She is very industrious and very respectful at school. She is also punctual during the mathematics lessons. Very kind to everybody at school, she is always the class perfect and very interested in working in group whenever the teacher is absent. Very sociable student, she is well-behaved. During her academic year at Lycée Sainte Marie SOKODE, she has been a good student and I wish she has to be so forever.
